

## Multipack Shrink Bundler

A company offers a multipack shrink bundler that can wrap any configuration of bottles, boxes, and odd-shaped items. The ILB24L-P features no-transfer wrapping that allows unstable-product multipacks to be produced. The machine can wrap items in configurations of 3, 6, 8, 10, or 12. It can run at speeds of up to 50 wraps per minute in a single lane or up to 100 wraps per minute in dual lanes. Adjustments are easily made using selector switches. Polypack Inc., Tampa Bay, FL; 727/578-5000; [www.polypack.com](http://www.polypack.com).
